# INSPIRED BY NORDIC NATURE

Great design is always in relation to and derived from the natural environment. Inspiration comes from all around us - boundless, pure Nordic nature. Sustainable and environmentally friendly operations have always been an objective for Balteco. We create while honouring our unique pristine nature as heritage we must protect.

Thus bathrooms are born which offer timeless design and durability for years of duty-free use. Our ambition is the creation of valuable space solutions for bathrooms that allow for freedom in interior decoration and offer high functionality with premium quality.

# PREMIUM QUALITY. WIDE RANGE OF COLOURS.

In order to assure high quality and durability of the furniture, Balteco offers exclusively cabinets built with MDF (medium-density fibreboard) only. Balteco produces all cabinet MDF elements, fronts, doors and shelves on the same latest technology production line ensuring consistent high quality of the furniture.

Processed MDF parts pass multiple times the automatic painting and surface treatment line to arrive with thick triple-layer paint finish to final high standard quality inspection. Thorough inspection applying the highest standards assures consistent premium quality of painted parts before assembly. For 2019 catalogue, Balteco offers wide range of Nordic finishing colours for flexibility and freedom of interior decoration.

# OVER 25 YEARS OF EXPERIENCE

Balteco was founded by a group of talented and ambitious engineers in 1990. Since then we have grown to become one of the leading producers of bathroom products in Northern Europe. We design, engineer and produce a wide range of bathroom products from baths to bathroom furniture. Our dedication to design and continuous quality development has paid off – over 70% of our bathroom production is exported to more than 25 countries.

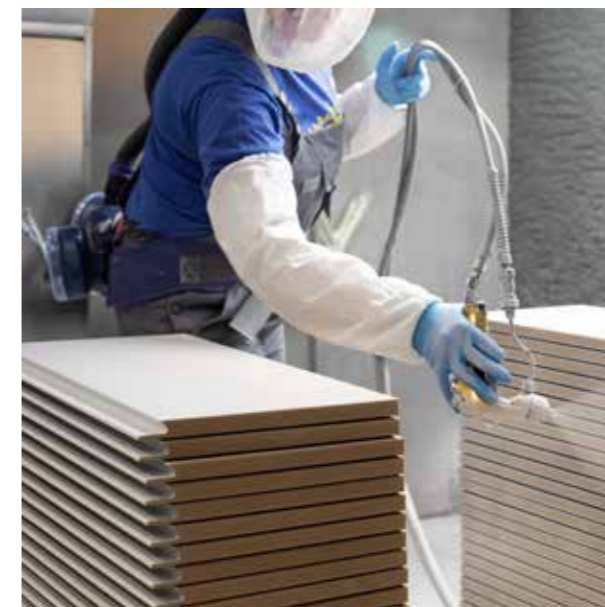

# CUTTING-EDGE TECHNOLOGY AND HAND-CRAFTED FINAL QUALITY

Balteco's high-quality bathroom furniture is made in Estonia, with a team of more than 150 people contributing: designers, engineers, machine operators, master craftsmen, testing team, customer service staff and others. Balteco's production uses the latest technology and is well organised to deliver consistent high quality (ISO 9001:2008).

## ONLY THE BEST MATERIALS

To ensure high-quality, functional, aesthetically pleasing, durable and long-lasting bathroom furniture, we use only the best materials.

- > All bathroom furniture parts from MDF (medium-density fibreboard) and basins are manufactured at Balteco – this is to ensure the use of the best materials that are available and to guarantee consistent high quality through full control over all valuable aspects of the furniture.
- > All bathroom cabinets, doors, fronts and other parts are produced from high-quality German MDF to offer quality, consistent finishing of all parts and better durability.
- > Doors and fronts made from both painted and PVC-foiled MDF are produced alongside the other parts of the furniture to ensure a perfect match of colour tones and finishing of decorative parts.
- > To ensure superb functionality and consistent high quality, Balteco exclusively uses Austrian Blum for all hinges and drawer system solutions.

# EXPERIENCED AND DEVOTED DESIGN TEAM

Design-thinking drives everything we do. Our aspiration is the creation of timeless, minimalist bathroom design with valuable functionality to offer lasting aesthetic harmony and everyday enjoyment.

**“Balteco’s product development sets standards for inspiring bathrooms.”**

Aivar Habakukk,  
Design Manager

**“Novel, timeless designs come through hard work and devotion.”**

Harri Ehrlich,  
Designer

**“What’s more important to us than anything else is that people feel comfortable in their bathrooms. And that’s something we don’t compromise on!”**

Argo Tamm,  
Designer

# XONYX SOLID SURFACE – EXTRA-HARD SURFACES

Basins and tabletops made from the innovative Xonyx solid surface are produced using a unique method known as the Slow Polymerization System (SPS), which brings out the best performance characteristics of the remarkable material. SPS technology perfectly blends the strength of natural minerals with the physical properties of resins and acrylic compounds, creating a structurally durable monolithic stone with an exceptionally hard scratch-resistant surface with a silky satin impression that is easy to clean.

# FURNITURE

---

Every person and their preferences are unique and should be considered in design. Balteco's designer furniture offers several series of outstanding bathroom space solutions - something for everyone. By combining high-quality materials, a wide range of finishing colours and valuable functionality, Balteco bathroom furniture offers and delivers more.

- > **Unique concept of durable MDF body, doors and fronts**
  - > **Wide range of painted furniture finishing colours**
  - > **Satin-finished Xonyx solid surface basins and tabletops**
  - > **Glossy GelCast basins**
  - > **Reliable and convenient soft-close doors and drawers**
  - > **High-quality fittings and fastenings**
  - > **Delivered pre-assembled, ensuring easy installation**

# TABLETOP BASINS

---

**XONYX™**  
SolidSurface

## **XONYX solid surface basins with extra-hard surfaces**

Basins and tabletops made from the innovative Xonyx solid surface and produced using a unique method known as the Slow Polymerization System (SPS) bring out the best performance characteristics of the remarkable material. SPS technology perfectly blends the strength of natural minerals with the physical properties of resins and acrylic compounds, creating a structurally durable monolithic stone with an exceptionally hard scratch-resistant surface with a satin impression that is easy to clean.

**GelCast**

## **Glossy GelCast**

Cast marble integrated basins come with a high-gloss finish. A mixture of natural minerals and polyester resins is covered in a non-porous glossy layer to guarantee a sleek look and easy-to-clean properties.

# CUSTOM-MADE TABLETOPS WITH INTEGRATED BASINS

---

A wide range of Xonyx Solid Surface tabletops with integrated basins

- > Tabletops with integrated basin(s) from 60 cm up to 300 cm long
  - > Standard depth of 50 cm
  - > Light and sleek 14-mm Xonyx tabletop or thick seamless tabletop look with 15-cm or 20-cm skirting
  - > Cut to measure, up to 300 cm long and up to 60 cm deep
  - > Extra-hard surface with a silky satin finish that is scratch-resistant and easy to clean
-

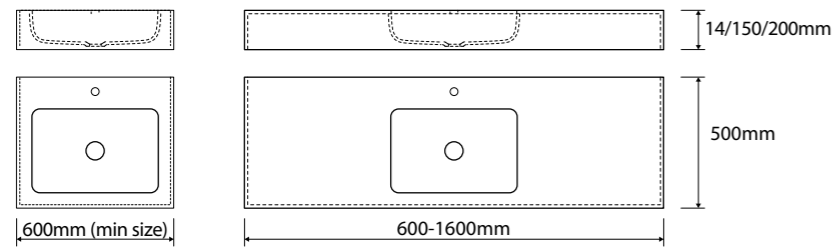

XONYX SOLID SURFACE BASIN WITH SEAMLESSLY INTEGRATED 20 CM FRONT SHIRT

## FULL CUSTOMIZATION AVAILABLE – SEAMLESSLY BONDED PERFECT SURFACES

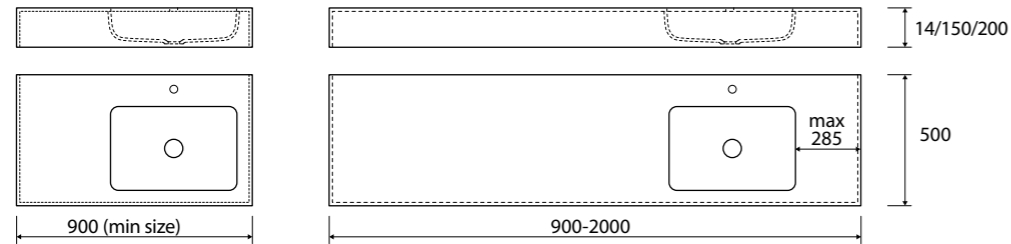

Custom-made Xonyx solid surface tabletop program with integrated basins offers up to three (3) basins integrated into tabletop with length up to 300 cm. In standard tabletop depth of 50 cm is offered, but at moderately higher cost tabletop depths up to 60 cm and full flexibility in basin(s) placement are available. Xonyx custom-made tabletops with basins are produced with 14 mm thickness. Thicker look may be achieved by adding front and side(s) skirting with height up to 20 cm. Perfect seamless look of the final product is achieved through quality bonding and thorough machining of the connected Xonyx surfaces. Slow Polymerization System (SPS) brings out the best performance characteristics of the remarkable Xonyx solid Surface material providing products with exceptionally hard surfaces that are much more resistant for scratches and easy-to-clean.
