

**Parquet**vinyl  
by lamett

# The look of wood, the ease of vinyl.

If you don't plan to go through life walking on tiptoe, you will know that almost every day has its little mishaps. And that's just as well. And your floor? That needs to look great, but must also be able to take a few knocks! Spills, dancing, jumping... Parquetvinyl can handle both life's little mishaps and its big parties. After all, Parquetvinyl combines all the advantages of wood flooring and easy-maintenance vinyl. Find out more about Parquetvinyl in this brochure!

# Water-resistant Parquetvinyl

## For lots of fun (and little drama)

It's always a joy to see your favourite little rascals having fun. They know how to capture your heart with their crazy ideas. They always have a project. When you see that twinkle in their eyes, you can't help but having fun along with them. In their universe, every day is an adventure in which fish can talk, your interior becomes an obstacle course and the floor is lava — or no, wait — a water slide! You smile and think 'luckily my Parquetvinyl is waterproof too!'

# Parquetvinyl, please!

Parquetvinyl is the latest generation of vinyl floors that has very little in common with the older techniques such as vinyl on a roll. In essence, it's a rigid carrier based on limestone, combined with an innovative top layer that faithfully reproduces the imperfections of wood and/or stone. So we're talking about a sturdy plank or tile. Thanks to the ingenious structure, you can hardly tell the difference between Parquetvinyl and real wood flooring or a ceramic tile. We also offer some collections in dryback: flexible but just as sturdy and beautiful. These floors must be glued and installed by a professional. Skirting boards and profiles are not necessary, so you can give your floor a really streamlined finish.

# Better than the real thing.

- 1 Matt PU top layer .....
- 2 Transparent hard covering .....
- 3 High resolution decor film .....
- 4 Ultra-strong, rigid carrier (RCB technology) .....
- 5 Integrated underlay .....

These are the  
nicest advantages of  
Parquetvinyl

Thanks to the extremely realistic decors, even real experts are never sure whether it's a wooden floor or not. Our designers work on the decors until they're true to life, down to the last detail. This is why we design small variations in the appearance of the boards to give the floor a natural look and avoid repetition. The surface texture is surprisingly real: you can see and feel wood or stone. And we go quite far to achieve that effect. Some collections have a synchronous wood structure. So if you see a knot or a wood grain, you can feel it too at exactly the same place.

1 Beautiful wood look that feels just like real wood

2 Ultra-strong and water-resistant

3 Suitable for every room in the home

4 Very easy to clean

5 Integrated underlay for all collections

6 The easiest click system on the market

7 Ideal for renovations

# So much more than a floor.

## Mat appearance

The low gloss level (just 2-4%) makes the floor look even realer!

## Tight Lock click system

The easiest click system on the market! You can then quickly lay it yourself with guaranteed watertight joints.

## Removing an existing floor?

That is usually not necessary! Minor unevenness is completely neutralised.

## Colour-fast and form-retaining

Parquetvinyl retains its colour and shape, also after many years!

## Synchronous wood structure

The perceptible structure of our floors matches the knots and grains in the drawing of the wood (also called 'Embossed in Register' or EIR). Just like a real board.

## High number of different boards

Then the natural look of wood is perfectly imitated and we prevent repetition.

## Integrated underlay

All our collections have a high-quality underlay. The floor noticeably dampens walking noise, neutralises unevenness in the subfloor and makes laying easy. And you don't need to buy an extra underlay!

### 100% recyclable and safe

Parquetvinyl is recyclable, reusable and contains no harmful substances.

### Strong and water-resistant

So can you live life to the full on your floor!

### Finishing options

With our various skirting, profiles and stair profiles you can finish Parquetvinyl floors down to the finest detail. Ask your distributor about the options!

### Underfloor heating and cooling

Parquetvinyl is highly suitable for most floor heating and cooling systems, along with excellent efficiency. Take advice.

### 1 Strong in price and quality

Whichever collection you choose, you can lay it in any space. There are sometimes technical differences, but the benefits are the same. There is a Parquetvinyl solution always with excellent quality for **every budget and every style**.

### 2 We give you personal advice

Choose Parquetvinyl for our experience and wide-ranging service! Choosing a floor is not easy and each situation is different. You will find a lot of info on our website, but don't hesitate to directly **contact us** or one of the distributors.

### 3 We help you choose

Follow us on Facebook, Instagram and Pinterest for inspiration and interior advice. You can use our **room viewer** to match your floors with your interior. Or virtually at least. Ready for the next step? Order samples of your favourite floors!

### 4 Life-long guarantee

We are obviously convinced of the quality of Parquetvinyl. This is why for each collection, you enjoy of a **life-long guarantee** for residential use. Even with commercial use you enjoy a nice 20-year guarantee!

# Choose cleanliness and convenience.

Narrow or wide boards or tiles, long or short... Parquetvinyl has an extremely wide range. You will then always find an attractive solution for your own particular use.

## Easy to lay yourself

Laying a Parquetvinyl floor yourself is not difficult, you only need **simple tools**. A pair of extra hands are helpful for working quickly (and for sharing a toast to the great result!), but is not essential.

You will find **detailed instructions** in the packaging which will guide you through the process. Prefer to watch a **video**? Scan the QR code below. We show you how to do it **step by step** and give **useful tips**.

Scan this code and watch the video if you would like to know how to lay it yourself!

Are you thinking about laying a glued PVC floor? Then call in a professional.

## Suitable for all areas

Parquetvinyl is suitable for every space: from the toilet to the attic and from the bathroom to the kitchen or bedroom. With Parquetvinyl, it is perfectly possible to have the same floor in the living room and the kitchen. It will look beautiful and be **easy to maintain**.

These floors are also suitable for **commercial applications**. A trendy pop-up store, a coffee bar, a restaurant, a hotel... many have already opted for Parquetvinyl.

# Dryback, fully glued so that you can live life to the fullest.

Sometimes you want the warm appearance of a wood-look floor but also the streamlined look and feel of a minimalist finish. A dryback floor seamlessly combines the two. The flexible vinyl strips are glued directly onto the subfloor. Added to that, you'll experience the most direct conductivity of your underfloor heating so that you can enjoy your Parquetvinyl floor twice as much.

## Some of our collections are also available in dryback

Be inspired by the collection pages in this brochure: the orange label indicates which collections are also available in dryback.

Remember: a dryback floor requires a perfect subsurface and must be installed professionally. So be sure to hire a professional to do the job.

## 5 reasons to choose dryback

- 1 Beautiful wood look that feels like the real thing
- 2 Optimal efficiency of your underfloor heating and cooling
- 3 No profiles or skirting boards required, giving you a very streamlined finish
- 4 The full gluing ensures good acoustics and a pleasant 'walking sound'
- 5 Easy to maintain: water-resistant and wear-resistant

**Streamlined finish, with no accessories.** This means the design of your floor and your interior are shown to their best advantage.

**Top of the class in thermal conductivity.** Less residual heat, so ideal for underfloor heating! Wonderfully comfortable.

# Maintenance- friendly Parquetvinyl

## For lots of fun (and little drama)

Your little rascals never stop growing and neither does the mischief they cause. Sometimes you're just not sure if you should make them stop or make them have even more fun. Secretly, you are proud, because that's just how you used to be. The apple never falls far from the tree. And flying croquettes always land on the floor. Yes, there are still certainties ... and if unforeseen accidents still happen, it's no big deal, because your Parquetvinyl is also surprisingly easy to maintain.

# Save time for the things that really matter.

## Maintaining Parquetvinyl is easy peasy

As with every floor, you should sweep or vacuum every day to remove pebbles and dirt that can cause scratches. Other than that, **regular mopping** keeps the floor in perfect condition. And you can mop to your heart's content because the floor is water-resistant. You can easily maintain the floor by adding 150 ml **Easy Peasy Floor Care** to your mopping water.

Order Easy Peasy Floor Care at [parquetvinyl.com](https://parquetvinyl.com) or fetch it from your local Parquetvinyl distributor.

## Favourite floor of pets and their owners

A trail of dirty paw-prints across the room, **a cat** that gets overexcited and knocks over a flowerpot or **your puppy** that welcomes you in a pile of feathers (where's that cushion gone?) ... With Parquetvinyl you can laugh about all of these things. After all, your floor is **clean again in a jiffy**. By the way, did you know that, with its **A+ label**, Parquetvinyl is ideal for **people with allergies**?

# Suitable for every room.

## Bedroom

With Parquetvinyl, you always get out of bed on the right side. This floor gives you comfort and warmth. Do you need to catch your breath a moment with a few yoga or meditation exercises? That's even more enjoyable on a Parquetvinyl floor.

## Bathroom

The ideal floor for in your bathroom: comfortable on bare feet, no slipping risk, water-resistant and completely hygienic. Has your teenage son spent ages in the shower and left the wet towels lying on the floor? No problem: Parquetvinyl can take it.

## Living room

A floor that is almost impossible to tell from real parquet, and that can be laid right into the kitchen. It exists! Choose the collection that best suits your home and style and enjoy the stunning effect every day.

## Kitchen

In the kitchen, you need a floor that can take a few knocks and is easy to maintain. If that pot of delicious spaghetti sauce slips from your hands and falls onto the floor, that's no problem for Parquetvinyl!

# We care.

## Concerned about your health and the environment? So are we!

**Parquetvinyl contains no harmful softeners.** This means we choose to use no harmful softeners such as phthalates. We are proud of our **green labels.** They are the proof that our boards contribute to healthy indoor air. So our range is **100% safe and healthy for people, animals and nature.**

## Sustainable lasts the longest

Parquetvinyl consists of high-quality synthetics and **lasts for decades.** We then together use fewer raw materials. If you opt for Parquetvinyl, you even enjoy a life-long guarantee, because we are 100% convinced of the **sustainability of our range.**

## Recyclable and reusable

We let nothing go lost during production. How do we do that? All residues are ground back to grains and re-used in new boards. Parquetvinyl is laid floating, so you can easily remove it. Do this according to the rules of good workmanship to nicely give your floor **a second life.**

## Safe and human-friendly: the facts behind our sustainable vision

**No phthalates,** only harmless softeners.

**VOC emissions** are 100 times lower than the European level.

**REACH-conform:** we comply with all European directives on dangerous chemical substances.

**A+ label:** the ultimate guarantee for the optimal quality of the inside air.

**Fusion process:** we use no adhesives because the layers are compressed.

**Healthy working conditions:** we produce Parquetvinyl under the best possible circumstances, with the focus on a healthy working environment and the welfare of our operators.

## Every little bit helps

We believe in the big impact that small actions can have. So we use **no plastic foil** around the cardboard packaging. Why should we? Parquetvinyl is perfectly resistant to moisture. We also deliberately only use **cardboard with an FSC label.**

# Lay it yourself? Yes, you can!

## Anybody can lay Parquetvinyl.

You don't need to be an expert to do it. Even the herringbone pattern can be laid by a well-prepared handyman or woman. The secret is to have a **flat undersurface**. Once you have that, your floor will be laid in no time and you can soon toast the result. **No expensive professional tools required!**

Parquetvinyl is highly resistant to **temperature fluctuations**, so you can start laying the floor straight away unless the temperatures are really extreme. The packaging includes **simple laying instructions**. Just read the instructions and start 'clicking'. Not yet convinced? **Scan the QR code and watch our installation video.**

Scan this code and watch the video if you would like to know how to lay it yourself!

## 5 reasons why Parquetvinyl is ideal for your renovation

- 1 Ultra-strong, despite the limited thickness (5 to 7.5 mm)
- 2 Can be laid on top of most existing floors
- 3 Easy laying, without dust or noise and with basic tools
- 4 Easy to click together, with no need for adhesives
- 5 Neutralises irregularities up to 5 mm

## Renovation: when old becomes more beautiful than new.

Anyone contemplating a renovation immediately worries about breaking up fixtures, dust in every corner, shortening doors, hidden problems emerging, unforeseen costs... With Parquetvinyl, the picture is a whole lot brighter.

**Breaking up an existing floor is usually not necessary.** Parquetvinyl can be laid on top of most existing floors if they are flat and firm. Its limited thickness makes it truly unique in this way! Noise and dust are also kept to a minimum, because **you do not have to saw anything.** What a relief!

Parquetvinyl is laid as a **floating floor**. So easily removing it afterwards is certainly an option. An attractive idea for a **student room** or a **rented property!**

**Are you thinking about laying a glued PVC floor?** Then call in a professional.  
**For more information about dryback, see page 10**

# Finished down to the last detail.

If you choose such a beautiful floor for your home, you obviously also want an attractive finish. Our various skirting, profiles and step profiles are further options. You can choose the same look as your floor (oh yes, all collections and colours!) or opt for the more 'invisible' and minimalist solutions.

## Matching skirting boards

### Matching skirting board

Do you want your floor and skirting board to match? Of course you do! We have **matching, moisture-resistant skirting boards** for all types of floors. After all, it's Parquetviny!

### Self-adhesive skirting

An adhesive skirting board gives your floor a **minimalist finish**. The **self-adhesive strip** makes the skirting board very easy to install.

**Prefer not to have skirting boards? Then choose the most streamlined result with dryback.**

Dryback is installed glued and can be laid right up to the wall. So no skirting boards or profiles are required. **For more information about dryback, see page 10**

## Paintable skirting boards

When you finish your floor with a paintable skirting board, **the room appears larger**. You can then decide whether to leave the skirting board **white**, paint it **the same colour** as the wall or paint it in an **accent colour**. There are plenty of possible options, ranging from a **fun quarter-round** to a **robust add-on skirting board** behind which you can conceal any cables.

- 1 **Quarter round trim**
- 2 **Paintable skirting board 60 and 80 mm**
- 3 **Covering skirting**

1

2

3

### One profile for all

One profile with 3 functions that **completely blends in with the look of your floor** and is also easy to install. Sounds like a great idea – and that’s exactly what our 1-for-all profile is!

**One profile, three functions:**

- 1 **End profile**
- 2 **Transition profile**
- 3 **Reducer profile**

### Aluminium profiles

You may not be a fan of skirting boards and profiles so you want to keep everything as **streamlined** as possible. In that case, you can opt for a **premium quality** aluminium profile. Available in the colours **silver, titanium, champagne** and **matt black**.

- 1 **End profile**
- 2 **Transition profile**
- 3 **Reducer profile**

### Step profiles

You can also line **steps and stairs** with Parquetvinyl thanks to our slender aluminium step profiles. Then everything is one uniform whole! The step profiles are **suitable for all Parquetvinyl collections**. You glue or screw them tight on your staircase and slide the boards neatly in.

### Light and colour, a dynamic duo

Did you know that **light determines** the perceived **colour of your floor** and therefore also of your **skirting board**? While your floor is horizontal, your skirting board is usually installed vertically, and that makes a big difference! So **always assess a skirting board while it is in a vertical position**. On the other hand, a profile and an adhesive skirting board can be laid on the floor for comparison. After all, they are also installed horizontally.

Visit our **website** for **more tips** about the best finish for your floor.

# Resilient Parquetvinyl

## For lots of fun (and little drama)

You are always more than happy to have the real life and souls of the party in your home. Because as you know, there's always something going on when they're around. They are the ones who make the housewarming unforgettable. Together, you create unforgettable memories that will still have you all laughing together five years from now. Luckily, Parquetvinyl can take a beating! That's great, isn't it?

# Discover the collections.

Parquetvinyl not only gives you the convenience of vinyl, but also the beauty of natural materials: it looks just like real parquet or stone. And that's a good thing, for your floor plays a big role in the atmosphere of your home. This is why it is not simply vinyl with a print. It is a carefully considered product with strong technical properties and a stunning look. Whichever collection you choose, you can also lay it in every type of space without problems. Be inspired!

The warm, natural colours of Tarn create an atmosphere in every interior, from the classical to the modern. This authentically natural-looking floor gives every room a timeless appeal. Among the seven colour tones, you are bound to find a tint that suits you and your lifestyle perfectly. This collection has an exceptionally low gloss level. That creates a very natural look and feel.

Restful and stylish, that's the essence of Yukon. The soft, natural colours are combined with a slightly rustic wood structure with just a few knots. But this floor is never boring. With its deep, realistic wood texture and exceptionally high number of different boards, you almost forget that it isn't a real wooden floor. Like all Parquetvinyl floors, this floor includes an integrated underlay that assures easy installation and extra acoustic comfort.

The Mantaro boards are large, wide and above all, strikingly beautiful. Extra-large planks have already been a trend for a while. They make the room look bigger and create an open atmosphere. The visible wood grain, the tangible surface structure and the exceptional mat look together create a sublime wood feel. This collection also has a thicker hard covering and an extra low gloss level. That creates a very natural look and feel. This collection also has a thicker wear layer.

The shorter planks of Tigris create a balanced décor. The calm colour variations provide a very natural look, while the small knots add dynamism. And the colours? These were inspired by the best-selling colours in the Nakuru collection. Short planks can give a room a more dynamic look thanks to the way they interrupt the long lines. In small rooms, they help create a feeling of cosiness and intimacy, while in larger spaces they emphasise the scale.

Concrete-look tiles are contemporary and popular choices for floors. Caldera Concrete combines the look of real concrete with advantages such as durability and ease of maintenance. The effect of the 40x80 tiles in a room is modern and sleek, creating a contemporary and minimalist look. The tiles fit well with a variety of interior styles and have the capacity to create both a warm and cool atmosphere, depending on the chosen colour and the other interior elements. They give a unique and modern look to both residential and commercial spaces.

# Unheard of, such a quiet floor.

**Nakuru. Superior acoustic quality.**

Your home is a warm nest, where home-lovers and the wilder ones come to settle. Even if they dash through the home, your Nakuru Parquetvinyl ensures an unheard of quiet. Let the young ones play and run about... Your noise-dampening floor will deal with all the noise. Eavesdropping does become a challenge, because Nakuru also dampens the sounds from a floor higher or lower. How Nakuru sounds? Fantastically... quiet!

# The quietest floor on the market

- 1 Multi-layered ceramic top layer for protection
- 2 Transparent hard covering
- 3 High-resolution decorative film
- 4 Premium vinyl for comfort, sound absorption and protection
- 5 Sound absorption layer
- 6 Ultra-strong rigid carrier
- 7 Integrated sound absorption underlay

Besides the small dramas and the big parties happening on your floor, your home must also be an oasis of calm so you can also recharge your batteries. You prevent very many negative effects on health, such as stress, headache, sleeping disorders and learning problems, by reducing ambient noise. And let that be exactly the purpose of this collection: Nakuru is not made of one material, but a number of layers of materials each blocking different noise frequencies. That remarkably improves the acoustics in the space (for you) and between different spaces (for the people living below you).

- 1 21 dB sound absorption, unique on the market!
- 2 The best product in its class
- 3 Beautiful wood look that feels just like real wood
- 4 Wear class 33 with 0.55 mm wear layer
- 5 Water-resistant and easy to clean
- 6 Suitable for every room in the home
- 7 Integrated underlay

# Bring quiet into a home full of life.

## Unheard of quiet

Nakuru has all the advantages of a Parquetvinyl floor and performs excellently for acoustics! Accordingly, Nakuru is up to 6 times quieter than other hard floors such as laminate and LVT. The floor absorbs no less than 30% more noise than a floor with a hard core (compared with a 4+1 mm SPC). You could even suddenly go tap dancing.

Nakuru combines a hyper-realistic design with restful comfort. Just like every other Parquetvinyl, the collection is 100% water-resistant, easy to clean and suitable for any space.

**Nakuru achieves -21 dB ΔLw and -10 dB ΔLin.**

We are proud of our achievements! A number of European tests confirm that Nakuru accordingly belongs to the exceptions in the market for floating floors.

## Less noise transmission

Music fanatic and a young baby in the house? With Nakuru, noise transmission between two adjacent spaces is reduced by 21 dB. TV, radio, stiletto heels or voices, people in the spaces above or below you will have significantly less discomfort.

## Less reflected noise

A cosy meeting up with friends on a Friday evening; there is surely always something to celebrate, isn't there? Besides the music and clinking glasses, you obviously still also want to be able to strike up a chat. Nakuru absorbs up to 30% more reflected and walking noise in the space than other hard floors.

Available in boards and in herringbone

Wondering how quiet a floor can sound?  
Watch our Nakuru video!

**Less reflected noise**

**Less noise in the space:** Nakuru reduces **noise reflection** and absorbs **walking noise**. No creaks, much less noise from children running through the room or from noisy toys.

**Less noise transmission**

**Less noise between the adjacent spaces:** Nakuru reduces noise nuisance from adjacent spaces such as from a TV or radio, voices and high heels.

**Grand**

Endlessly enjoy the **grand peace** that Nakuru brings, visually and noise-wise. **The long and wide boards** bring style to any space. They are more than 1.8 m long, 23 cm wide and only 7.5 mm thick.

**Tangibly the most pleasant**

**The surface structure** of the board runs fully **in line with the decor!** When with Nakuru you see a knot or a wood grain, you can feel it too at exactly the same place.

**Brilliant in mat finishing**

**Nakuru is extra mat** with only 2-4% gloss, so it very closely resembles **the appearance of real wood**. Enjoy the beautiful, natural look.

**Very strong**

Our wear layer of **0.55 mm really is the business**. With **wear class 33** you can also opt for Nakuru in your **commercial premises**.

# Peeping in

We are curious about your story!

Are you considering laying Parquetvinyl in your home soon? Are you planning a renovation with something spectacular? Maybe you are already busy with building? We are curious about your story!

We would much like to come along for a stylish interior report and a photo shoot of you, any fellow residents and the floor. Obviously we do not come with empty hands!

Who knows, maybe we will be paying you a visit shortly! Register now on our website [parquetvinyl.com](http://parquetvinyl.com)

## The home of Wendy and Sebastien is a real spectacle

The home of **account manager Wendy, architect Sebastien, son Nelson and daughter Bowie** was clad with 32,000 roofing tiles, has three gable roofs and a façade without doors or windows. They also made their own **highly individual choices** inside.

‘We very deliberately chose **parquet floor below and Parquetvinyl above**. In our living room and dining room we wanted a floor with some patina, above we opted for **ease of use**. With a toddler and baby at home an accident can happen now and again, **but we do not let it stress us out**. That is the big advantage of Parquetvinyl: everything is quickly and **easily cleaned up** with **no traces left behind**. Laying is a cinch because Parquetvinyl has an integrated underlay.’

Be inspired by others. Discover, for example, why Wendy and Sebastien went for Parquetvinyl and had their home thoroughly renovated. It has become a home that you cannot miss when you pass by. Curious as to whether they also made such daring choices inside?

Read the full article online for more tips from Wendy and Sebastien.

# And now choose...

## Find us on social media

Follow us on **Facebook, Instagram and Pinterest** and look through our photos. Be inspired by **interior ideas** and **reports** from customers before you. You will certainly be wowed by our floors!

## Choose the right floor for your home with our room viewer

With our room viewer you lay **your favourite floors in a few seconds in your home**. Or virtually at least. Take a photo, upload it and find the floor of your choice. You can also easily **compare floors** with the handy slider. You can then see which floor matches your interior best. The Parquetvinyl room viewer removes any doubt!

Scan the code and make a simulation with our room viewer.

## Order samples of your favourite floors

Do you already have a certain floor in mind or do you **still have doubts between colours?** Order samples and lay them in your own interior. And literally. See how the **effect of the light** changes in the course of the day and look in the evenings **in artificial light**. You can then make your final choice with ease.

You can find all the collections on the website. Scan the code and order your samples.

*The colours of the floors in this brochure may differ from reality due to the light and the printing process.*

Parquetvinyl is a Lamett product range. In addition to Parquetvinyl, we also offer parquet floors. For more than 15 years, we have been a reliable partner in the realisation of dream floors in Europe and far beyond it. You only buy a good floor once or twice in your life. We guarantee you that a Lamett floor meets all the quality requirements. And no less than that. With a close-knit team, we offer a personal and professional approach and develop floors that make you happy.
